The following is an examiner's statement of reasons for allowance: no prior art of record, alone or in combination, teaches a motion platform having a combination of a plurality of inflatable actuators with each actuator attached to a deck or base at a location intermediate the base and the deck, and a plurality of compliant stabilizers disposed intermediate the deck and the base, at least one portion of each stabilizer disposed approximate one of the actuators. It is noted that Pajot shows the use of inflatable actuators (136, 138) in an apparatus for unloading and reloading containers. However, there is no reasonable motivation to combine with the dynamic ride vehicle of Baxter.
